

Delibar Interface Replacement Icons

by kremalicious | Matthias Kretschmann
www.kremalicious.com

What's this?

Replacement Icons for the interface of the delicious.com desktop client for Mac OS X from Shiny Frog.

Usage

We're going to replace the default app resources so you should do a backup of the Delibar app or just download a fresh copy from Shiny Frog if anything goes wrong or looks weird.

1. Close Delibar if it's running
2. Ctrl + click or right-click on the Delibar app in your Applications folder and choose Show Package Contents
3. In the opened Finder window browse to Contents > Resources
4. Drag the contents of the Icon Resources folder from the download package into this place, replacing the current files
5. Start Delibar and enjoy!
